

Dear All,

A brief message to our trusted partners, suppliers and stakeholders at a difficult time.

With the continued spread of Coronavirus globally, Clemtech has implemented working practices that will allow us to maintain a "business-as-usual" position whilst continuing to deliver our duty of care to our staff, contractors, stakeholders and in fact every person who interacts with our business. In addition to everyone's health and wellbeing we will provide the access and support to ensure the on-going success of our clients and their projects.

Clemtech have put into effect the following measures which will be regularly reviewed as the situation unfolds:

- In line with HM Government advice, we have instructed our staff to avoid all non-essential travel in the UK and all travel overseas
- We have asked our staff, where possible, to work from home
- 'Business as usual' by utilising various digital communication channels

With a reduced service on the Network we have an opportunity now to carry-out tasks which will help minimise the spread of Coronavirus, whilst equally optimising down time in the industry. Clemtech can support:

- Deep Cleaning of Trains – seats, dado panels, flooring and CET etc.
- Deep Cleaning of Depot facilities
- Provide Technicians for repairs, refurbishments, exams, extensions and audits.
- Mod programmes
- Performance mods
- Competency assessments
- Shunters

Our staff remain available to all clients throughout this period of uncertainty, If you would like to discuss any requirements, please contact:

**Andy Peat** - *Head of Sales* **E:** andy.peat@clemtech.co.uk **T:** 07515 396 454
